Inter-School Track Meet.

The annual inter-school track meet will be held at Borden on Friday, October 6th. Arrangements were made at the meeting of the executive held at the Didsbury school on Monday afternoon.

The different schools taking part in the meet will be: Crossfield, Carstairs, Didsbury, Olds, Bowden, and Innisfail.

There will be the usual 3 classes in the various competitions: 12 and under, 15 and under, and the open class, the contestants' ages to be taken the day of the meet.

A silver cup is the trophy to be awarded the school gaining the most points. The local school has always made a good showing at the meet and the students are going to spare no effort to bring the cup to Didsbury.

Cheques No Good.

For issuing "N.S.E." cheques in payment for credit and cash, James F. Millen, of Bowden, was given suspended sentence for six months by Magistrate Peattie at Olds on two false pretence charges, according to a report received Friday last. Millen gave a cheque which subsequently proved to be "N.S.E." to Fred Reifenshain, Didsbury, for \$12.00, and one for \$5.00 to D. M. Sinclair, also of Didsbury. Restitution was made.

New Style Gas Pump.

The Builders' Hardware has just installed one of the new Bowser Exacto electric gasoline pumps in front of the store. One of the main features of the pump is that at no time over a quart of gas is above ground, customers always getting gasoline which is of a cooler temperature and which they claim means actual weight and measure. There is no possible guesswork about it—the hands of the pump showing at all times the amount of gas you get. The pump is passed by the fire underwriters and could even be put right in the store, so we are informed, which if correct is a good protection against fire for the town. Mr. Speelman is quite proud of the pump and states that good gas "like Union 76" warrants the best pump obtainable and invites all to inspect it, or better yet, "try a fill."

Obituary.

The funeral of Mrs. W. A. Hallock who died at Grande Prairie, was held at Zion Evangelical Church on Thursday last, Rev. H. J. Wood conducting the service.

Mary Lila Stewart was born on May 26th, 1899 at Denver, Colo. She came to Alberta in 1919 and was married to W. A. Hallock. After their marriage they lived in this district for about 4 years and then moved to the Peace River district, taking up a homestead. She passed away on Friday, September 1.

Deceased leaves to mourn her departure: her husband, three children, Alfred, Shirley, Derral; one sister, Mrs. Elmer Petersen and one brother, William.

ELIZABETH McALLISTER.

Mrs. Elizabeth H. McAllister passed away at the Didsbury Hospital on Thursday, September 7th after several weeks illness.

Elizabeth Hamilton Porterfield was born July 26th, 1859 at Elton Township, Ont. She was married to Samuel McAllister. She moved to Alberta in 1911, taking up land about 15 miles east of Didsbury. She resided on the farm until the time of her death.

A member of the Baptist church at Stratford, Ont., Mrs. McAllister since coming to Alberta attended the Evangelical church services at Lone Pine. She was an active worker with the W.C.T.U. and was made a life member of the Lone Pine branch several years ago. Her unflinching kindness during sickness in the community will make her loss to be felt in the neighborhood. She was predeceased by her husband about 16 years ago and is survived by one son, Samuel Roy, Didsbury, and a brother, William, in Ontario. The funeral services were held at Zion Evangelical Church, Rev. H. J. Wood officiating.

Off To A Good Start.

The Boys' Band got off to a good start Monday night when they met for the first practice. There will be about thirty instruments and the boys seem very enthusiastic. The director states he has some good material to work with and that in a few weeks they will be able to get down to produce real music.

LOCAL & GENERAL

Dr. J. L. Clarke is reported to be progressing very nicely and is expected home in a few days.

Mr. and Mrs. Stadelman and children, of Portland, Ore. are visiting Mr. and Mrs. Wm. Dagford for a few weeks.

Misses Ruby and Irene Kercher, who have been visiting their sister Mrs. Purdy at Sundre, returned home Sunday.

Mr. and Mrs. Alex. McNaughton returned Saturday after spending a couple of weeks with their son and daughter at Vancouver.

Mr. and Mrs. J. H. Frey, of Acadia Valley, are visiting with Mr. and Mrs. Alex. Snyder and other relatives in the district.

Mr. Levi Steckley, an oldtimer of the Didsbury district, is visiting Mr. and Mrs. Troyer and renewing acquaintances here.

The Rev. John Schwalm, Toronto, visited his nephew Mr. M. Reiter last week. Mr. Schwalm is 82 years of age and is making a tour of the West.

Mr. and Mrs. Elmer Cowitz entertained a few friends at their home Tuesday evening last, when the Alberta Frontiers, string quartette from the C.F.A.C. radio station played a number of selections.

Alf. Studer and Geo. Julian leave on Friday morning for the Trochu district in quest of duck. Alf. read the report that ducks are destroying the crops in that district, so he immediately bought a license and is going out to help save the crop.

Mr. and Mrs. M. Weber, who have been exhibiting the products of the Rosebud Flour Mills at the various fairs in the east, returned home last weekend. They report as having had a very cordial reception at every point, and as a result of their efforts were successful in introducing the Rosebud Pancake Flour at a large number of stores in Manitoba and Saskatchewan.

At least \$150,000 will be required to handle the relief situation in 13 rural and municipal districts from Hanna east to the Saskatchewan border, if the estimate brought before a meeting at Chinook is anywhere near correct. Recommendations calling upon the Provincial government for assistance in the matter of food, clothing, fuel, medical service, feed and seed, were passed.

At Didsbury

Liberal Leader Will Speak at Didsbury

Mr. W. R. Howson, leader of the Liberal party in Alberta will speak at Didsbury in the Opera House on Tuesday, September 19 at 8:00 p.m. Since his appointment as leader Mr. Howson has been in the spotlight both in the house and in the different ridings he has visited. He is a forceful speaker.

Shooting Season Starts Noon Friday

The open season for shooting ducks, geese and Hungarian partridge opens at noon on September 15th.

The bag limit for duck is not more than 15 in any one day during September and from October 1st to November 14th not more than 25 per day. Not more than 100 duck shall be taken or killed during the season.

The bag limit for geese is not more than 10 geese in any one day or 25 geese in the season.

Fifteen Hungarian partridge is the day limit and not more than 200 during the season.

WEEKLY JOKE

MacNab while on a visit to London called at a restaurant for dinner. He gave his order to the waitress and waited patiently. At last, when he had almost given up hope, along came the waitress with his meal. He looked at her in amazement and said, "Are ye the lassie who I gived my order to?"

"Yes sir," was the reply. "Weel, weel," returned MacNab, "fancy that now, and ye dinna look a day older!"

Prominent Stockman Passes Away

The death of Mr. R. C. Oldham which occurred Sunday at his home saw the passing of one of the most prominent stockmen in the district.

Deceased was 79 years of age and was born in the United States. He was married in Nebraska in 1882 to Elva Worley and they lived in that state until 1908 when they moved with their family to Didsbury. They settled east of town and in the earlier years Mr. Oldham acquired a large acquaintance in the district as a stock buyer. For a number of years, however, he lived quietly on his farm four miles east of town.

Richard Conway Oldham was a man of sterling character and gained many friends in the community and who were sorry to hear of his passing.

In October of last year Mr. and Mrs. Oldham celebrated their golden wedding anniversary.

Besides his widow, three sons and one daughter survive to mourn his loss: Guy Oldham, of Portland, Ore.; Richard Oldham, of Didsbury; Dr. E. W. Oldham, Portland, Ore.; Mrs. E. P. Jarvie, of Nelson, Alberta.

The funeral services were held on Wednesday afternoon at the M.B.C. Church and interment took place at the Didsbury cemetery.

Province's Deficit Is \$2,107,521.00

Alberta's deficit for the fiscal year ended March 31, 1933, amounted to \$2,107,521 after \$759,802 had been set aside for sinking fund purposes, it was announced by Acting Premier Hon. George Hoadley.

This was a reduction of more than \$3,000,000 from the previous fiscal year, when the deficit on general revenue fund was \$5,153,050.

Attention, Stomach Sufferers!

WORLD HAPPENINGS BRIEFLY TOLD

Hundreds of men have gone to work in lumber and fishery operations on the British Columbia coast, according to government officials.

Harold Lake, who wrote the words for the song, "I Hear You Calling Me," died at his London home after a long illness. He was 51 years old.

Forty-six blind World War veterans travelled from all parts of Scotland recently to hold a reunion in Edinburgh.

Though patchy in some localities, the honey crop of western Canada will be a little higher this year than last year, according to C. V. Gooderham, Dominion apiarist, who completed a trip to the Pacific Coast.

Prominently mentioned as a possible Liberal candidate for Peel county in the forthcoming Ontario provincial election is Duncan Marshall, former Alberta Minister of Agriculture.

Renewed efforts to untangle problems that must be solved before the steel and oil industries are brought into the fold of "Nira" were promised by Hugh S. Johnson, U.S. Industrial Administrator.

Thomas Laughlin produced a sock and poured 3,000 coins on the desk of Miss Emelyn Robert, secretary of the Golden Gate Junior College in San Francisco, to pay his entrance fee. He saved the pennies during his high school days.

First of its kind in Australia is the special police branch organized by the air force, and first of the flying police is Aircraftman Snook, who is being specially trained to head the peace officers of the air. An expert flyer, he has had no previous experience as a policeman.

An improved mail service to Churchill began recently and will continue during the navigation season. Instead of only one mail each week, Churchill residents may now receive letters and newspapers on Wednesdays and Saturdays. Outgoing mail will also leave Churchill twice weekly.

Mussolini Never Flinches

Even His Dentist Cannot Get Him To Admit Pain

Il Duce never flinches—not even in a dentist's chair.

"Questo al fare soffrire un poco," says his dentist, like most of his profession when about to embark on some delicate explorations of the oral cavity.

And Mussolini's answer to his soothing remark, when translated means: "This is going to hurt a little," invariably is:

"Non temo il dolore (I do not fear pain)."

Dr. Arrigo Perno, of Rome, the man who for eight years has been the Italian dictator's private dentist, told how his patient carries on during the trials that make some strong men quail and whimper.

In Chicago to attend the Centennial Dental Congress, Dr. Perno said Il Duce fears neither the smart of the drill, or its descent into recesses of the teeth.

Assured by his patient that he has no fear of pain, he has been down pretty hard at times, said Dr. Perno. He hasn't been able to get a sound out of Mussolini in eight years.

Not a Certainty

Nazi Regime Will Go The Way Of All Such Movements

Chancellor Hitler says that the Nazi regime will endure forever. The interesting thing about that is not that he is wrong but that he thinks he is right. After five or six thousand years of recorded history the average man and woman know that nothing in this world at least, can endure forever, or even for any really long time. But movements such as Hitler expresses need the kind of humorless fanaticism he enunciates to keep them going even the little while that they may endure. New York Evening Post.

Passengers can now read the time by a clock on the Eiffel tower, the illuminating at night lighting up a dial 61 feet in circumference.

W. N. U. 2008

Problems Of Statesmen

Not So Easy To Manage Affairs In These Days

It is, of course, unfair to judge modern statesmen by the old standards. Statecraft today has not only to handle complexities that were undreamt of fifty or a hundred years ago, but it has to reckon with a democracy so keenly alive to its own importance that in all the chances of the world it has become the terror that walketh by night. It was easy to run Europe—even to ruin it—when the Man on the Street was merely a speck on the horizon. Glasgow Weekly Herald.

Caravans Travel By Tractor

Camels No Longer Take Mohammedans To Holy City

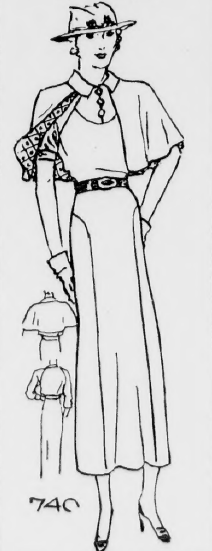

The romantic camel caravan of the Arabian deserts has gone into history, according to Rev. S. M. Zwemer, Presbyterian missionary.

Automobile bodies adjusted to caterpillar tractors have entirely supplanted the camel, he said today, in conveying the thousands of Mohammedans across Arabia on their annual visits to the Holy City.

Even in these dull years, he said, at least 50,000 annually make the pilgrimage.

By Ruth Rogers

YOU'VE BEEN NEEDING SOMETHING SMART FOR TOWN? HERE'S YOUR MODEL.

It's a youthful affair, rather suggestive of military styling.

Especially those who might consider a little slenderizing will find this model exceedingly attractive. While a slate-blue suit crinkly crepe silk inspired the original model, a red and white patterned crepe, a dark blue and white polka-dotted crepe or grey crepe silk are other good schemes.

The crepe is removable.

The pattern provides for long or for short sleeves.

Style No. 740 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Size 36 requires 4 1/2 yards 39-inch with 1/2 yard 39-inch lining for cape.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

SAVE THE POKER HANDS

Belongs To "Flying Family"

Lord Londonderry's Youngest Daughter Becoming Official of Artillery

Lord Londonderry, air minister, whose family may well be known as the flying family, has just gained his "A" certificate for flying at Heston air port, Middlesex.

To do this he completed a three-hour solo flight and passed an altitude test, and is now allowed to fly a machine, though he cannot take up paying passengers.

A few days earlier Lord Londonderry's second daughter, Lady Margaret Stewart, also qualified for her "A" certificate, and his youngest daughter, Lady Mary Stewart, who is not yet 13, is rapidly becoming an accomplished flier.

Lady Mary is one of the youngest if not the youngest, of flying pupils, and she is making such splendid progress that it will not be long before she will be able to make a solo flight. Her instructor is Capt. V. H. Baker, chief inspector at Heston, who says, "She cannot obtain a certificate until she is 17, but will be permitted to fly solo within three miles of the aerodrome."

Capt. Baker also said that on his highest test Lord Londonderry went up to 2,000 feet, shut off his engine and glided on to the aerodrome well within the specified landing area.

The Late Dr. Macoun

Contributed Largely In Establishing Possibilities Of Agriculture In West

The death at Ottawa of Dr. William Terrill Macoun, Dominion Horticulturist was recently reported. After taking ill on his annual inspection of experimental farms during which he attended the World's Grain Exhibition at Regina, he returned to his Ottawa home early in August. Dr. Macoun was in his 65th year.

His career in horticulture, which to him was both a profession and a hobby, has been outstanding. His efforts in establishing the possibilities of the western provinces for agriculture date back to the 70's. Assiduously, he gave many years to his breeding of new varieties of apples, and by the unanimous vote of the American Pomological Society, convening at Roanoke, Virginia, in 1930, was awarded the Wilder silver medal for professional work in pomology.

Born at Belleville, Ont., in 1869, Dr. Macoun joined the Dominion Central Experimental Farm when 18 years of age.

Surviving him are one son and three daughters, residing in Ottawa, and a sister, Mrs. R. A. Kingman, Wellingford, Vt.

Supplies Shipped To North

A rush order of 10 carloads of supplies for Hudson's Bay Company posts in the western Arctic has been shipped by waterways to replenish posts in that section of the northland. The order was made necessary as a result of the abandonment of the S.B. Arroyo, which was turned back by low flows in the north Pacific.

Ignore Shell Fire

Halifax Yachtsmen Have Faith In Marksmanship Of Artillery

Artillery men who direct their fire at floating targets in Halifax harbor pay no attention to yachts that cross their line of fire—and the yachtsmen pay no attention to them.

Racing yachts tack back and forth in the firing area each Saturday afternoon but none of them has ever been hit. High velocity shells scream directly overhead, passing within a few feet of the boats before they splash into the water near the targets and the yachtsmen continue placidly on their course.

Time when the yachtsmen would keep a wary eye on the guns as their craft entered the danger zone; but now, so accurate is modern artillery marksmanship, they no longer regard it as a danger zone and sail by with scarcely a glance at the battery.

Recipes For This Week

(By Betty Barclay)

RIPE GRAPE JELLY

4 cups (2 lbs.) juice.
7 1/2 cups (3 1/4 lbs.) sugar.
1/2 bottle fruit pectin.
To prepare juice, stem about 3 pounds fully ripe grapes and crush thoroughly. Add 1/2 cup water, bring to a boil, cover, and simmer 10 minutes. Place fruit in jelly cloth or bag and squeeze out juice. (If Malaga or other thick-skinned grapes are used, the juice is known should be added to prepared juice.)

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard 1/2 minute. Remove from fire, skim, pour quickly. Paraffin hot jelly at once. Makes about 11 glasses (6 fluid ounces each).

CARROT AND CABBAGE SALAD

1 package lemon-flavored gelatin.
1 pint water.
2 tablespoons vinegar.
1 teaspoon salt.
1 cup raw carrots, grated.
1 cup raw cabbage, finely shredded.

Dissolve gelatin in warm water. Add vinegar and salt. Chill. When slightly thickened, fold in carrots and cabbage. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

Licenses to keep cows are issued by the London County Council to fifty places in the County of London, most of these being in the East End. There are more than 1,600 cows kept in this way.

For the first time in England scientists in the university laboratories at Oxford have liquified helium, the non-inflammable gas for airships.

Italy's wheat crop this year is expected to total 6,500,000 tons.

Tells Time By Lights

Huge Clock In Paris Has Not Regulation Face and Works

Parisians are seldom concerned over the time of day. There is inherent in the French temperament too great a capacity for enjoying fully the present moment to permit any particular preoccupation with the passage of the hours. Engraved on the pastime of appreciating culinary delights, for instance, the Parisian would probably be inclined to resent having a "Big Ben" boom out the fact that he has been at the luncheon table two hours already. The absence of a clock face is probably explained by some such scruples, and at the same time explains the exceptionally great interest taken in the debut here of what is authoritatively described as "the biggest clock in the world." Certainly it is one of the "tallest," for it is placed about two-thirds of the way up the Eiffel Tower, at the height of 636 feet, and it measures 63 feet in diameter. Besides its unusual dimensions, however, the French version of "Big Ben" has other claims to distinction. For although it is visible from almost any point in Paris, it has no face, no hands, and no works—at least not in the usual sense of the terms. The answer is that the new clock is a luminous one. The hours, from one to twelve, are simply great colored lights, or reflectors. The "hands" are lines of electric light bulbs, which burn for a minute, then go out, and the line further on is then illuminated to burn in its succession for one minute. The hour "hand" operates in the same way, but of course more slowly. The "movement" is regulated by a synchronized electric motor.—Christian Science Monitor.

Historic Sites

Movement For Preservation Of Places Of National Interest Started In 1919

The movement for the preservation of national historic sites in Canada dates back to the year 1819. Representations were made to the then Dominion government urging the necessity of a national organization for the preservation of historic sites and as a result an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given their services without compensation. The recommendations of the board are made to the Department of the Interior, which through its national park branch takes the necessary action.

Used New Type Balloon

In a new type balloon, Dr. Max Cosyns, who was with Professor Picard last summer in his ascent into the stratosphere, and Ernest Desmuyter, a noted Belgian aeronaut, have made several trips lasting 24 hours or more. Most of their trips have been over Belgium and France. Their craft is equipped with devices to permit it to rise or descend at will or remain stationary. Dr. Cosyns plans to make a trip into the stratosphere.

The Canada Year Book, 1933.

The publication of the 1933 edition of the Canada Year Book is announced by the general statistics branch of the Dominion bureau of statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the various branches of production, trade and transportation, finance, education, etc.—in brief a comprehensive survey within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1933 Year Book extends to over 1,000 pages dealing with every phase of the national life and more especially with those susceptible of statistical measurement. Attention may be specially directed to the statistical summary of the progress of Canada included in the introductory matter and giving a picture in figures of the remarkable progress the country has made since the first census of the Dominion was taken, 62 years ago in 1871.

The volume is illustrated with many maps and diagrams and the latest available data is everywhere included. Immigration and trade statistics for fiscal year 1932-33 and miscellaneous agricultural figures of the 1931 census will be found in the appendices.

Owing to the urgent need for economy in distribution of government publications it has become necessary to make a change to all individuals receiving the Year Book, though free copies will continue to be supplied to government departments, public libraries and newspapers. Individuals requiring the book may obtain it from the King's Printer, Ottawa, as long as his supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By a special concession, however, university students needing the volume in their work, teachers, and ministers of religion may purchase the volume from the King's Printer at a nominal price of 80c.

"Kritiks' Korner."

Evidently there is still some hope for progress. The fence about the schoolyard has been removed. Now, if about half the trees were cut out to make room for the rest to grow, the appearance of the property would be still more improved. And while we are on the subject, the front entrance to the High School building should be kept straight out to the sidewalk.

We wonder how long it will be before the front of the Bank of Montreal building will be fixed? Also, when will the mayor remove his "sidewalk show window"?

Speaking of sidewalks, the new cement walk on Shady Avenue is a move in the right direction. May we soon have more like it.

—OBSERVER—

Provide \$100,000,000 For Financing Wheat

The Dominion gets its understanding to be providing a hundred million dollars, roughly, to deal with the wheat situation.

Particular secrecy surrounds the details this year as before, but guarantees are said in well informed quarters to be continued in respect to the wheat which is on hand and in an initial way in respect to the new crop to be handled by the Central Selling Agency.

Just what quantity of wheat the government is responsible for has never been stated officially, but there are reports that the amount of guarantees established in a revolving manner is \$105,000,000 and that this represents 150,000,000 bushels at 70c a bushel.

What the effect of this new financing on wheat prices will be, no one is in a position to say. While it all depends upon the uncertain conditions in the world market, a continuation of the support is reasonably expected to have a stabilizing effect upon prices, and with a tendency to appreciation.

Epidemic of Dysentery.

A serious epidemic of dysentery prevails in town, and the provincial department of public health has ordered the local board of health to take certain measures to prevent the spread of the disease, which is most infectious. These measures are being taken immediately, and the following suggestions are made to the citizens:

"Every care should be taken to have doors and windows properly screened against flies."

"Milk and water will be analysed, but in the meantime and until the danger is over, all water should be boiled before drinking, and milk should be pasteurized as follows: place milk in a double boiler, bring water in lower boiler to boiling point, then move boiler to back of stove to cool off. DON'T BOIL THE MILK."

"All refuse vegetable matter and manure must at once be removed from your premises. The scavenger should be at your place this week, but if you should be overlooked please call the secretary's office and the matter will be given attention."

"All toilets should be made as dryproof as possible. This should be done at once and it is suggested that building or other such thick paper be used in doing this. A thorough inspection of toilets is in course of being made."

It cannot be too strongly impressed upon the citizens that the situation is serious, and the earnest co-operation of every person is requested.

Large Exports Of Alberta Butter

Calgary district produce companies are participating in the largest export movement of Alberta butter in the history of the province to the United Kingdom. It was announced just recently.

Total shipments of 12,000 boxes or 672,000 lbs. of butter from Alberta will be underway to Liverpool and other Old Country ports by Sept. 15.

Officials of Calgary produce firms state that a large surplus of butter will be disposed of by this means and that Alberta farmers will benefit considerably thereby. Expectations are that when the surplus of butter is removed the farmer will receive a better price for his cream.

The shipments are being rushed to the United Kingdom from the prairie provinces to fill orders before the Australian and New Zealand product comes into competition next month.

Calgary firms participating in this huge butter movement are the Southern Alberta Dairy Pool, Burns & Co., Campbell & Griffin, Central Creameries, Associated Creamery, and the Alberta Produce Co. The Alia creamery is also contributing.

One shipping point out that if the surplus butter was kept in Alberta, depressed prices would be in effect this winter. It might mean that many producers would be put out of business on account of low prices. With the butter off the Canadian market the producers are likely to get a better price for their cream this winter.

Practical Hog-Raising Results are Outlined

Following the recommendations of the livestock branch, Dominion dept. of agriculture, the following practical results in hog-raising were obtained by Mr. A. Campbell, of Reston, Man.: Litter of 12 pigs weighing 2,000 lbs. at \$4 per cwt. = \$107.60; 12 sows at \$1 each, \$12 = value of litter \$119.60. Costs: barley 5,588 lbs. at 20¢ per bushel \$34.92; oats 816 lbs. at 25¢ bushel \$6; wheat 720 lbs. at 50¢ bushel \$6; milk 11,400 lbs. at 10¢ cwt. \$14.40; feed costs \$91.32; marketing 2,650 lbs. at 60¢ cwt. \$17.48 = total cost \$78.80. Profit on 12 hogs \$10.80; profit per hog \$3.40.

WEEKLY SERMONETTE

Estimate Average Canada Wheat Yield Will Be 10 Bushels

A crop report issued Monday by the Dominion bureau of statistics told how devastating had been the effect of the drought and armies of grasshoppers on Canada's wheat crop. The report estimated this year's crop for the entire Dominion at 282,771,000 bushels.

Last year the crop was 128,514,000 and the year before 321,325,000 bushels. The high record was in 1928 when with fewer acres under wheat than this year a harvest of 566,726,000 bushels was garnered. Not since 1924 had the crop fallen below 300,000,000. The total that season was 262,097,000. Even that year acre for acre the yield was better than that estimated for 1933. The average yield in 1924 was 11.9 bushels to the acre. This year's estimate is 10.9. In 1928 the yield was 23.5 bushels an acre.

YOU will be MORE THAN SATISFIED by having your Watch, Clock, Phonograph, or Sewing Machine fixed right in Didsbury. All my work is guaranteed. Reasonable prices.

A Call To Service.

The prairie provinces of Canada are again this year faced with the heavy losses, and the resulting problems, which another crop failure over extensive areas brings in its wake. The Western United States is in the same deplorable state. Drought, grasshoppers and other insect pests, wind and hail, have all taken their toll, and hundreds of farmers for the third, fourth, even fifth year in succession have nothing to show for their year's labor. It is a discouraging situation.

According to the reports of the Dominion Bureau of Statistics the yield of wheat will be the smallest, with the exception of one year, since reports began to be compiled by the Bureau 25 years ago. What is true of wheat is true of other grains. Officials and inspectors of the Saskatchewan Relief Commission state that the relief problem will be as great, if not greater, than in any previous year in that province, while a Manitoba cabinet minister is reported as saying that 2,000 farmers in one section of that province will not thresh a bushel of wheat.

The enormous direct loss thus imposed on the people of Western Canada, and the largely reduced purchasing power of this country, will have a direct and adverse effect upon employment not only throughout the West but in the factories of Eastern Canada, upon our railways, and upon our national, provincial and municipal finances.

Governmental relief must be forthcoming to meet all absolute needs of people, to prevent actual suffering, to conserve the health of people—in a word, to sustain them and provide for their needs for another year at least. This is the least that any government can do for its people; it is, in fact, a primary responsibility of any government, a duty that must be discharged.

There have been periods of crop failure all down through the ages and in all countries, and governments have had to care for their people. But plenty has also always followed famine. Discouraging as the present outlook may be, there is no cause for despair. People will be provided with the necessities of life; they are not going to be left to suffer and starve. They will have nothing to show for their year's work, it is true, but they will be able to start again next year.

But there is surely something that people can do for each other in times of discouragement and need like the present. There must be scores of ways in which people can assist and encourage each other even though they may have little in the way of available resources. While Governments must absolutely essential needs, cannot people through voluntary effort of their many organizations, and as individuals, extend not merely sympathy but practical encouragement and help to others who have suffered much more severely and are in danger of losing confidence in themselves, in their country, in mankind itself?

In this connection it is gratifying to read of the action taken by the citizens of Kerrobert town and district in Saskatchewan. Representative citizens have banded themselves together, and are promoting a relief organization for their district, which will not interfere in any way with the work of the rural, municipal, or town councils, or government relief, but which will be supplementary to all these official agencies. These citizens will themselves bring that sympathetic human touch, and provide assistance in various forms which no official body can do, but which are so essential in maintaining the morale of people.

Voluntary organizations of all kinds throughout Western Canada should appreciate the fact that, whatever the object of their organization, there is no finer, better, more important and necessary work they can do this winter than in extending cooperation in all measures of relief. There is really little excuse for the existence of any organization in our community life which does not at a time like the present forget all else but the welfare of people who are in need, and arouse its membership to assist in meeting those needs whatever they may be.

The State, representing all the people, will discharge its obligations, but let the great heart of humanity as represented in each and every one of us, and by so many of us organized under different names and for many different purposes, respond to the call, carry all the cheer that is possible into discouraged homes, scatter all the sunshine of life that can possibly be spread about, and thus bring encouragement to those who are inclined to think there is no longer even hope left to them.

Submerged Village Uncovered

A fishing village near Tollymore, North Malabar, with a temple at one end, was submerged by the sea in 1855. With the coming of the 1933 monsoon the village gradually is being uncovered. An extensive stretch of sand has emerged connecting the site of the village with the mainland, with the sufferer victims from the other side and people are visiting it searching for relics.

At the London economic conference the Germans installed their own telephone switchboard and German operators.

India is importing more commercial motor vehicles.

Barley Staple Crop In Japan

Barley, ranked barley (ryes) and wheat constitute the staple crops raised on the upland farms in Japan. Owing to the high protein content of barley and excellent milling qualities of Canadian hard wheat, the Japanese use it in a standard mixing substitute for the soft wheat of the United States. The work of the MacMillan commission established a central bank it would not necessitate doing away with the present banking system he said.

At 152 degrees below zero some metals, such as silver and copper, lose their resistance to electricity, becoming superconductors.

Peru's exports are 50 per cent higher than last year.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it strikes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extra Wild Strawberry and see how quickly it will give relief.

The Age Of Aluminum

Two Railroad Cars Made Of This Metal Exhibited At Chicago

David Dietz, in an article in New York World-Telegram, says:

"Two all-aluminum railroad cars are among the most interesting and most important exhibits in the Hall of Transportation at the Chicago Century of Progress World Fair.

One is a combination of coach, parlor and observation car facilities. The other is a combination of sleeper, parlor and observation car. Both are gleaming, inviting works of art. On the day I visited the Hall of Transportation thermometers were registering a temperature of 100 on the sidewalks of Chicago, and the air-cooled interiors of these two cars were the most comfortable spots on the fair grounds.

The bodies and trucks of these two cars, with the exception of the springs, axles and wheels, are made entirely of aluminum. This is the first time that this has been accomplished, although aluminum car bodies were fabricated two years ago.

To many engineers, these aluminum cars represent the direction in which the railroads must go to recover their business. In other words, they must make travel by rail so attractive and inviting that tourists will prefer it to their own automobiles.

But in addition, many engineers see more than railroad recovery in these two cars. To them they are the symbol of the next age, the Age of Aluminum.

Many railroads are beginning to turn their attention to the subject of aluminum rolling stock."

Agrees On Wave Lengths

Canada Satisfied With Agreement For Radio Outside Broadcasting

Judge E. O. Sykes, of Mississippi, chairman of the United States radio delegation of Mexico City, in a press statement, said Canada and the other eight North and Central American countries represented at the recent radio conference, reached entire agreement regarding frequencies or channels for radio other than broadcasting. He mentioned in this classification, international, state police, point to point telephone and telegraph, coastal telegraph and telephone, ship telegraph and telephone and amateur.

He further said agreements reached on technical matters relating to broadcasting would be of great benefit. While the conference failed to reach agreement on assignment of channels for broadcasting to various countries, it agreed on certain technical regulations of this class of radio.

Functions Of Central Bank

Would Not Prescind Do Away With The Present System

Warning against Canadians adopting the view that the particular functions of a central bank, in the event such an establishment in Canada, is to extend credit to agriculture, was given by Professor T. E. Gregory, British economist, who addressed the Canadian Club in Regina.

"It is fundamental to my view of central banking that it should keep its hands off any one particular industry," said Professor Gregory, "whose address dealt with the subject of central banking. W. G. Yale presided at the meeting."

If Canada, as a result of the work of the MacMillan commission established a central bank it would not necessitate doing away with the present banking system he said.

Ocean Space Limited

A considerable number of cattle are finished and now available for export. Ocean space, however, seems to be inadequate to meet the requirements of many producers who wish to export their own live stock. Due to the steady flow of cattle leaving Canada, this condition should remedy itself in due course. Intending shippers should try to secure space from the broker some considerable period prior to the contemplated date of shipping.

While the human population of the world is estimated at 1,849,500,000, the rat population is placed at 10,000,000,000, or at the proportion of six to every human being.

Poor Crop In Canada

Wheat Crop Lowest In 25 Years With One Exception

Agricultural experts thumbed record books, comparing crop conditions with those in past years. This is what they found:

The condition of the Canadian wheat crop is the lowest in the records of the Dominion Bureau of Statistics, going back 25 years, with the exception of 1931.

The barley crop is in the same position as wheat—the lowest in 25 years with the exception of 1931.

The flax and oat crops are the lowest in the records of the bureau.

Only once, in 1914, were Canadian pastures in worse condition.

The crop year 1931 was particularly bad for Canada because of drought conditions throughout the southern growing areas of the prairies, particularly Saskatchewan. This year drought and heat, reinforced by plagues of grasshoppers, have taken a toll of millions of dollars. Dry weather this year extended from Quebec westward to the Pacific coast.

Russia Caring For Horses

Animals Now Given One "Free Day" Each Week

Every dog has his day—but now it's Old Dobbin's turn.

There are 30,000 equines in Moscow and they are poorly fed, badly cared for, and abominably treated, even though drivers caught beating or otherwise mistreating their horses lose their driving licenses and food carts and are liable to prison sentences.

The plan of the transport department of the Moscow Soviet has taken steps to remedy this distressing state of affairs. It has decreed that each horse shall enjoy a "free day" every sixth day, just as the human being is permitted to do in the U.S.S.R. Thus 5,000 horses will be out of service every day in the year.

The plan of the transport department for the care of its animals goes further. It is establishing a rest home for its horses: Free, green pastures for the lame and the tired, special diet for the poorly nourished, medical care for the sick.

Canadian Radio Broadcasting

Western Canada To Have Its Own Regional Directors

Western Canada will have its own organization working within the Canadian Radio Broadcasting commission and this machinery will be set up shortly, according to T. Maher, vice-chairman of the commission.

Three regional directors will be appointed for western Canada, one stationed at Vancouver, another in Winnipeg, and the third appointed from Alberta and Saskatchewan. These men will constitute a board to govern, under the commission plan, the western regions chain. Mr. Maher said.

In addition there will be appointed in Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton and Vancouver, representatives of the commission.

Abandon Trackage

United States Railways Find Truck And Motor Bus Best Business

A combination of factors, of which officials find the primary one to be the rapid development of hard-surfaced highways, is causing the railroads of the United States to abandon trackage at a greater rate than ever before.

Figures in interstate commerce commission reports show 1,800 miles of track were abandoned in the nine months ending August 1, which nearly doubles the 945 miles abandoned in the entire year ending November 1, 1932.

Upside-Down Flying

F.S. Aviator Travels 300 Miles In Inverted Position

Flying with his landing gear turned skyward, Lieut. Tito Falconi, Italian Royal Air Force officer, regained his upside-down flight record only 24 hours after he had lost it to Milo G. Barnham, 30-year-old Long Beach, Cal., aviation instructor. Falconi flew in an inverted position two hours, eight minutes, 54 seconds, making a round trip to Santa Barbara, about 200 miles.

DRIVES HIMSELF TO WORK AT 82

And Still Plays A Little Golf

How many of us, when we are 82, will be equal to the health and activity of this vigorous old Scottish engineer? In a letter he says—

"I arrived here from Scotland on the 7th April, 1870. I am over 82 years old. I drive my Ford Car 80 miles over hills and dale to a factory, and can still play a little golf. I have taken the little dose of Kruschen Salts in my cup of coffee every morning for some years, and I believe it is keeping me in good health and enabling me to keep on working at the factories as engineer"—L.A.

Whether you are still in your 'teens or past your prime, it is neither too early nor too late to start on the "little daily dose." Just a tiny, tasteless pinch of Kruschen Salts in your morning cup of tea or coffee! They ensure internal cleanliness, and keep the blood-stream pure. New and refreshed blood is sent coursing to every fibre of your being. Rheumatism, headaches, indigestion and backache all pass you by.

Alberta Sugar Beet Industry

Has Brought Greater Stability And Security For The Farmers

Introduction of the sugar beet industry to southern Alberta has brought greater stability and security in their irrigation waters and the factory at Raymond, Alberta, is now a steady source of revenue for the grower.

Outlining the growth of the industry, D. W. Buchanan, student of western affairs, points to its success in a paper prepared for the Institute of Pacific Relations conference. Effective control has made development of sugar beet growing a great aid to mixed farmers of the area, he finds.

For the past two years the total sugar tonnage secured has run over 100,000 tons. The factory was increased to a capacity of 1,250 tons daily and in 1932 the factory worked 120 days to handle 150,000 tons of beets, though only planning to operate 100 days during and immediately after the season.

Dealing with payments to farmers for the sugar beets, Mr. Buchanan points out the basic price varied with a bonus being paid to growers of the sale of the sugar warranted. The basic price has been around \$5 and \$5.50.

Canadian Is Appointed

Former Edmonton Man Made Food Commissioner For U.S.

S. W. Lund, general manager of the Swift Canadian Food products company, was yesterday named as food commissioner in the office of G. F. Swift in Chicago, has been appointed food commissioner of the United States by President Roosevelt under the recent agricultural stabilization bill passed by Congress. Lund had previously received by Gordon Robertson, manager of the Edmonton Swift Canadian plant.

According to meagre information received the former Edmonton man was recommended for the important post by the stabilization bill board because of his extensive experience and knowledge of the provision industry.

Mr. Lund was appointed Edmonton manager of the Swift Canadian plant in 1917, coming from Toronto where he had worked for the company for several years.

He left in December, 1926, to assume duties as assistant general manager in the Chicago office of the company.

Cigarettes smoked in Australia in the last year averaged 875 per person.

Tests Are Being Made In Extensive Program To Improve Quality Of Western Wheat

Details of an extensive program to improve western wheat crops and thereby raise the premium which Canada obtains on world markets for her grain were revealed by Dr. L. H. Newman, Dominion cerealist from Ottawa, who is carrying out tests of the west with Major H. G. L. Strange, former wheat king of the world.

Description of the extensive scheme was given by Dr. Newman in this manner. "We are endeavoring," he said, "to obtain a picture of the varieties of wheat being grown across the northern farm belt to learn where the grain is fairly pure and where it is badly mixed. Now that we are getting this picture we are trying to improve the seed used by the farmers.

"Last fall," the cerealist explained, "samples of grain were collected from 6,100 farm wagons at country elevator points and this year grain has been grown from this seed. We established 16 group points with about 400 small plots at each. Now we are going over grain samples at each place. Field days, too, are being held simultaneously with the identification of the varieties.

"In some cases, the farmers do not even know the names of the varieties of wheat they were growing. The farmers, at the time the samples were taken last fall, were asked to give the name of the variety they thought they had. This was noted by the elevator man concerned and the grain was graded. Now, we are classifying the resulting grain under these three heads: Good, which is fairly pure seed which can be used; passable, suitable seed for carrying on with for a while, and undesirable, made up of a number of varieties which should not be used for seed."

Defies Superstition

S.S. Pennyworth Trip Takes No Notice Of Ill Omens

In setting a record passage of three days through Hudson Strait and Bay, the S.S. Pennyworth defied all the ill omens of the sea and defeated three ships in the race to be first vessel into the new Canadian port this season. First of all her triumphant docking was accomplished Sunday, the 13th.

She sailed from both Glasgow and Antwerp on Friday, and made her landfall at Resolution Island 13 days after clearing from Antwerp. She picked up her pilot at Churchill Sunday at 13 hours 15 minutes, ship's time, 13 days after leaving the British Isles at Pentland Firth, and so became the 13th ship to reach Churchill from Europe since the port was established two years ago.

When the ship's log was hauled in outside Churchill harbor, it registered exactly 13 miles, and the forward end showed a draft of exactly 13 feet when the ship was moored at the dock.

And then Captain Giffon remembered he celebrates his birthday on the 13th.

Britain To Build Ships

A substantial addition to the British navy, including several cruisers, destroyers and submarines, is being planned as a sequel to the recent ship-building programs of the United States, Japan, France and Italy. The Admiralty is understood to be planning to provide for the program in its next budget. The ships, however, cannot be completed before 1936, because of the London naval treaty.

New Definition

An optimist is a man who rejoices in news of drought, floods, locusts, chinch bugs, tumbleweeds, phylloxera, hoof and mouth disease, boll weevils and other constructive forces tending to raise prices. A pessimist is a man who disseminates news about fine growing weather, thriving flocks and other factors inimical to a firm price structure.

Each passenger riding in a Turkish commercial aviation airplane is automatically insured for \$4,700.

W. N. U. 2003

Soil Fertility

Condition and Texture Is As Essential As Chemical Composition

In considering the matter of soil fertility and the value of soil analysis, it is well to bear in mind, says the Dominion Chemist, that the productiveness or fertility of a soil is by no means entirely determined by the percentages of plant food constituents present, nor even by the proportions of those which may be actually available for immediate crop use. The soil, for thrifty and profitable growth, must not only contain a sufficiency of the chemical elements in readily assimilable forms to supply the food requirements of the crop, but the soil must be of such a mechanical condition or texture as to offer a fine seed bed for germination, and permit of a ready extension of the root system as growth advances.

While allowing free water to pass through and drain away, the soil must have an absorptive capacity to hold over sufficient moisture for the supply of the crop during periods of drought. This is very important. It must not be too close and compact to exclude air, and at the same time, it must be firm enough and fine enough to give the plant support and retain moisture. Such land is said to be in "good heart," or, otherwise stated, mellow, friable and favourable tilth. This condition is consequent upon its proportion of sand to clay and particularly upon its percentage of humus, or semi-decay vegetable matter, derived from manures or crop residues.

Quite An Occasion

Royalty Used To Take Ocean Dip With Great Ceremony

It is sad to hear of George the Third's bathing machine, with its royal shroud, fulfilling the function of a toy shed: Weymouth should have a better memory than that. It might remember that day which Emily Barney speaks of, when his majesty stepped down to the briny to the strains of the National Anthem secreted in a neighboring machine. It took the art of bathing a long time shake off the ceremonial touch. When the Duchess de Berri visited her bathing cabin on the beach at Dieppe, she was received with a salvo of artillery; after which "the Inspecteur de Bains, clad in a resplendent uniform, cocked hat, and white gloves, led her royal highness into the sea until the water reached his knees. When he retired with three profound obeisances."—London Observer.

Photographic plates are now kept in refrigerators to preserve their quality and uniformity. This treatment is particularly adapted to plates intended for astronomical purposes.

LORD BESSBOROUGH VISITS MILITARY CAMP AT PETAWAWA

Our picture, taken when the Governor-General visited Petawawa Camp, Ontario, shows His Excellency observing artillery fire through powerful glasses while Major-General McNaughton, Chief of the General Staff, looks on. On the right of the picture can be seen Lord Duncannon, son of Lord Bessborough.—Photo by Artina Studio, Pembroke, Ontario.

By Ruth Rogers

PUFFED SLEEVES ADD DRESSY APPEAL TO SLIM-LINE TAILORED DRESS

It is as interesting at the back as it is at the front. And equally smart made with long or with short sleeves as in the miniature view.

For everyday occasions, you'll probably choose the long sleeves and carry it out as the original. It is flattering. Eleanor-blue shade in a novelty shadow striped patterned crepe silk. For the round shoulder yoke and puffs of the sleeves white crepe was used.

It's especially youthful with short sleeves in grey crepe silk. Style No. 382 is designed in sizes 14, 16, 18, 20, years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 1/2 yard of 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Air And Stored Potatoes

Thorough Circulation Of Air Is Necessary To Keep Stored Potatoes In Good Condition

Careless storing of wet potatoes is responsible for unnecessary annual losses. Potatoes ought to be stored dry in a cool, well-ventilated cellar which is perfectly dark. Piling potatoes in heaps in warm and poorly ventilated cellars creates the most favorable conditions for rotting. Before placing the potatoes in a cellar, wooden slats slightly apart should be nailed about six inches or more from the wall, and a temporary floor with cracks between the boards should be laid about six inches above the permanent floor. This will ensure air to circulate around and under the pile of potatoes. If it should so happen that the pile has to be very large, square ventilators made of wooden slats and running from top to bottom of the pile should be put in here and there. Together with the circulation of air at the sides and at the bottom of the pile, these ventilators will keep the potatoes in a much better condition than if they were in a solid pile. Another good plan recommended by the Dominion Department of Agriculture is to keep the potatoes in large crates made with slats, the ventilation between the crates assisting very much in keeping the potatoes in good condition. The temperature of the storehouse or cellar should be kept at nearly 33 or 35 degrees Fahrenheit as possible.

Names Just Reversed

Puzzle Of Odd Signs In New York Easily Explained

The business of one of those observant fellows who are bothered by odd signs has taken him along Chrystie Street several times of late, and he discovered a peculiar thing. At No. 63 is a firm of jewelers named Kovitz & Pashutsky, and five doors away, at No. 51 is the jewelry firm of Pashutsky & Kovitz. This got on his mind to a point where he went into one of the places and demanded an explanation, which was graciously given as follows: The firm of Kovitz & Pashutsky was founded at No. 62 fifteen years ago, and the two partners took a younger brother of each in as clerk. All went smoothly until it was felt the firm wasn't doing well enough to support all four. The younger brothers were advised to seek new jobs. They went up the street and opened a shop, reversing the names in the original title. There was some hard feeling at first, but now all speak cordially when they meet. Both firms seem to get enough business.—The New Yorker.

Argentina expects bumper crops this season.

Individual effort by every citizen in frankly facing his or her problem and thereby making a maximum effort towards its solution was the high road toward elimination of economic difficulties. Speaking at Ottawa recently, Hon. H. H. Stevens, Minister of Trade and Commerce, put forward this belief.

"First," said Mr. Stevens, "the individual citizen should study how he or she can contribute towards the relief of those in need. Not by giving charity but by a sane effort to use the resources that each has, in a useful way so as to provide additional employment for those who require it." Painting or repairing the home, purchase of clothing or any other useful means, he illustrated, would give employment of personal resources and afford the finest contribution which could be made at this time.

"I challenge the right of a landlord to receive rentals from an insanitary and dilapidated building when he is financially able to replace it with a decent structure." From this proposal alone there could be afforded enough new and needed construction to give such stimulus to employment as to materially, if not wholly eliminate want and suffering.

At no time had the number on relief in Canada exceeded little more than 10 per cent of the population, and this total had been reduced, declared Mr. Stevens. If the remaining 90 per cent put forward the best effort of which each individual was capable, a substantial absorption of those in need could be achieved.

Touching on the world economic conference, he said to term it a failure is a mistake. Without doubt, the gathering together of such a concourse of distinguished persons and the personal contacts which inevitably ensued, must bear fruit in the future.

The steady increase of the business of Canada with other parts of the empire as a result of the imperial conference agreements, said Mr. Stevens, gave evidence that when genuine efforts of co-operation were made results advantageous to all may be achieved.

New Kind Of Madness

Mild Man Turns Into Manic When Riding Car

Powerful stuff—gasoline. There is a kind of gasoline intoxication that changes the entire nature of some men. Sometimes it is found that even the mild-mannered man who loves his family, is kind to animals and courteous to everybody, cannot stand gasoline at all. As soon as he gets into an automobile he isn't polite to anybody but a policeman.

On foot, he says "You first," or "Pardon me sir, may I step ahead?" or "That's all right, old man. I'm in no hurry." But seated in a vehicle propelled by gasoline, he gets a megalomaniac's view of the value of time. He may not be going anywhere in particular but he wants to get there right away.

He watches for the smallest opening to jam ahead. If he is thwarted in the attempt, he glares at the fellow who gets in his way and perhaps hurls an insulting epithet. If the car is an unavoidable delay for a moment, he bawls his horn and the aggregate efforts of the entire group of gasoline-intoxicated machines turns bedlam loose.

Filling the air with raucous mechanical blowing, howling and screeching is an attendant symptom of gasoline madness. Dashing ahead through traffic and hooting everybody out of the way is another. The manifestations vary with age and temperament of the subject, but even in the mildest natures the tendency is toward crude manners and lack of consideration. Kingston Whig-Standard.

Are you thin or fat? If you are here is advice for you. If you are fat, don't eat fast, and if you are thin, don't eat—Fast.

Security and Protection

Grain growers the length and breadth of Alberta should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building-up of a strong elevator system on strictly grower controlled, co-operative basis. Having this in mind the best course to follow is to

Burnside Notes.

Mr. Bob McCulloch is home from Banff, where he has been driving a bus for Brewsters.

Mr. and Mrs. Corrie Stumpf spent Sunday with Mr. and Mrs. Leon Doll.

Mr. and Mrs. Albert Arlenson visited with Mr. George Metz and daughter Alberta on Wednesday.

Mr. and Mrs. John Topley made a business trip to Macleod and Lethbridge last week.

Mr. Lewis McCulloch, who had his tonsils removed in Calgary last week, spent the weekend recuperating at his home here.

Threshing started the first of the week and is going nicely, with fair yields for such a long dry summer. Nearly every second farm has a machine busily threshing away.

The funeral took place in Didsbury on Sunday of Mrs. Elizabeth McMillister, who passed away Thursday in the Didsbury Hospital after a painful illness of a month's duration. A woman of generous heart, many a sick and needy neighbor has good reason to remember her kindness. We extend our sincere sympathy to her son, Sam McMillister, the only surviving member of the family.

Melvin Notes

Mrs. Chas. Young spent a few days last week with Mrs. Ed. Parker.

Miss Hazel Ray spent the weekend with her parents at Garfield.

Mrs. A. Krebs and Miss Hazel Ray spent Monday evening with Mrs. Julien, of Didsbury.

Miss Dorothy and Mr. Ross Young were guests of Mr. and Mrs. Emil Krebs at a birthday dinner Sunday.

Mrs. John Clarke visited with Mrs. W. J. Hilbyard and Mrs. W. J. McCoy, of Didsbury on Tuesday.

Mr. and Mrs. J. Troyer, Toronto, are guests of Mr. and Mrs. Peter Johnston.

Mr. Eddie Krebs spent the weekend at Bowden with his sister, Mrs. H. Bliss.

Miss Florence Bissett, of Byron school spent the weekend with Miss Dorothy Young.

Mr. and Mrs. John Clarke were visitors on Sunday with Mr. and Mrs. Lutkehaus.

Miss Dorothy Young, of Dog Pound school, spent the weekend with her parents Mr. and Mrs. Chas. Young.

Word has been received from Mr. and Mrs. Roscoe Irwin at Delburne, and friends will be pleased to hear that they are getting settled in their new home and are pleased with the country round there.

Mr. and Mrs. A. Krebs and family and Mr. and Mrs. Wm. Brown spent a pleasant evening at Thursday with Mr. and Mrs. Ted Cuffling, the occasion being the birthday of Mrs. Cuffling and Eddie Krebs.

Lost—Red Roan 2 yr old Short-horn Bull, ring in nose, ear tagged. Last seen 3 weeks ago in my pasture on 18 31-3-with. Suitable reward for finder.

LOCAL & GENERAL

Miss Nellie Wilson has been on sick leave during the week and Miss Nelda Hugst has been taking her class at school.

The subject of the sermon at Zion Evangelical church next Sunday morning will be, "Love Covers," and in the evening, "Spiritual Insurance."

On Sunday evening at 7.30 the Anglican Church of St. Cyprian will observe its harvest festival. All donations of fruit, flowers, grain, vegetables, etc. should be left at the church before 8 p.m. Saturday.

The report goes that the other Sunday two of our prominent fishermen went out to the river accompanied by their wives. The men went ahead and fished the stream without much luck. It took the ladies to coax the fish onto the hook and one landed an 18-inch trout.

Rallying to support the Navy League of Canada in its work of assisting the widows and orphans of men of the mercantile marine service, Didsbury citizens subscribed \$15.00 in a recent campaign. Led by Fred Cooke, organizer of the Alberta division.

Cash Income \$257

For U.S. Farmers

In a sampling study of 6,382 farmers in representative localities, the department of agriculture at Washington found that the average cash income of each for 1932 was \$257. This compares with \$158 in 1931 and \$1,050 in 1928.

The figure is the excess of cash income over cash expenses, but does not include provision for interest payments on farm debts or the living expenses of the farmer and his family. These farmers reported that they had consumed food of their own production valued at \$161 at farm prices during 1932.

Cards of Thanks

We wish to thank our friends for their sympathy and kindness during our recent bereavement, also for the floral offerings.

Wm. Hallcock,
Mr. and Mrs. Peterson,
Wm. Stewart.

Mrs. Jonathan R. Good and family wish to acknowledge with grateful appreciation the kindness and sympathy extended by their friends at Didsbury in their bereavement and loss of a loving husband and father.

I wish to extend my thanks to the neighbors and friends for their kindness and sympathy during the illness and loss of my mother, especially the nursing staff of the Didsbury Hospital for their unflinching kindness.

Sam R. McAllister.

RUGBY NOTES

With an attendance of twenty-two Rugby W.I. met at the home of Mrs. D. Evans for this month's meeting. A short business session was followed by "Current Events" from Mrs. C. Young. This branch is taking up the home economics short course offered by the home economics dept. of the A.W.I. A splendid paper written by Mrs. A. H. Rogers and entitled, "Let Us Take a Look at Ourselves" was enjoyed very much by all. A contest on the working of the provincial organization was won by Mrs. Hogg. The October meeting is to be held at the home of Mrs. C. Brown.
